

## ROBOTS

Robots are very good in helping people. Robots are used in hospitals, factories, houses, and even space! It might seem impossible but robots often help doctors with surgeries. They are basically extensions of doctors' fingers. Robots make surgery more precise and the scars are smaller.

Robots in factories usually stay in one place. One popular kind of robot is the robotic arm. It is used in assembly lines to do things like paint cars, fasten bolts, or screw on lids.

We have sent many robots into space. They are the vehicles that land on different planets. When robots get there, they roam over the surface. They take pictures, dig in the dirt, and analyze specimens. Then they send all of this information back to us.

impossible – niemożliwe  
precise – dokładny  
scar – blizna  
factory – zakład, fabryka

assembly line – montażownia  
fasten bolts – umocować, przytwierdzić gwinty  
roam over – przemierzać  
specimen – okaz

### Województwa Polski

1. Połącz nazwy województw z miejscami na mapie:

- 1 łódzkie
- 2 warmińsko-mazurskie
- 3 podkarpackie
- 4 dolnośląskie
- 5 zachodniopomorskie
- 6 mazowieckie
- 7 kujawsko-pomorskie
- 8 podlaskie

- 9 świętokrzyskie
- 10 wielkopolskie
- 11 lubuskie
- 12 śląskie
- 13 małopolskie
- 14 lubelskie
- 15 opolskie
- 16 pomorskie
